RE-EXAMINATION QUESTION PAPER PG-DAC MARCH 2022

Module Name: WPT

DATE: 13 / 09 / 2022 **Duration:** 2 hrs. **Max. Marks:** 40

Instructions:

Same as the main paper.... Dave your backup properly as your PRN.

HTML, JAVASCRIPT, BOOTSTRAP:

Q. Create a HTML5 form to accept Bank Account details:

Account Details			
Account Id:	101		
Account Name:	Anita Patil		
Account Type:	Savings ~		
Balance:	60000		
Creation Date:	01-02-2021		
Save info	Account Info		

- Use Javascript/Jquery to validate the form:
 - o All fields are mandatory
 - o Balance must be numeric and cannot be below Rs 5000
- Use Bootstrap to style this form.
- When user clicks on "Save info" button, the account information on form must be converted into a Javascript object and stored into an Javascriptarray.
- When user clicks on "Account Info" button, all account details stored in array must be displayed in console.

REACT JS:

Using the Account array created earlier, use React to create a component AccountComponent that will display account data in a neat HTML table. Pass account information from App component into Account component. Output should be something like:

Account Information

Account ID	Account Name	Account type	Balance	Creation Date
101	A R Patil	Savings	75000	2021-02-19
102	Manisha Singh	Savings	35000	2021-01-01
103	Pawan Kumar	Current	5000	2021-02-10
